Hiring Team
Sciemo

Re: Customer Success & Support Engineer (Part Time)

Dear Sciemo Hiring Team:

I am applying for the Customer Success & Support Engineer position. I bring experience helping users adopt new technology, writing practical operating procedures, and coordinating technical service requests. Sciemo's emphasis on helping customers use ONE confidently fits the work I have done across public safety and Marine Corps communications.

At Jacksonville Fire and Emergency Services, I supported the transition from Windows mobile terminals to approximately 24 iPads across 12 apparatus and four stations, helping troubleshoot issues and guide personnel using the new devices. As Protective Equipment Manager, I also drove a Firehouse-to-ESO migration over several months. I reviewed Excel source documents and created more than 2,700 individual equipment records in ESO. That work moved the department's equipment inventory into its new application.

During a temporary assignment to the Jacksonville Police Department Telecommunications Center, I authored or revised six SOPs, including instructions for GlobalProtect VPN access, radio channels, and on-call notifications. That work required turning operational requirements into steps personnel could follow. At Sciemo, I would bring that approach to user guides and walkthroughs, using recurring questions to identify where clearer documentation or a focused training session would help.

In the Marine Corps, I assisted a help desk serving approximately 200 users, provided Windows and network support, and trained more than 210 personnel through demonstrations and practical exercises. I also processed more than 150 maintenance and service requests through GCSS-MC. Clarifying what users needed, maintaining accurate records, and coordinating the right technical resources were central to that work. Those habits would support careful triage, clear customer updates, and useful handoffs to Sciemo's engineering team.

I hold an associate degree in Emergency Management and am pursuing a BS in Information Technology with a concentration in Data Networking and Security. I would welcome an interview to discuss how my technical support and instruction experience could contribute to Sciemo's customer success team. Thank you for your consideration.

Sincerely,

Derick Jermaine Gary
